Ist strand cDNA was primed with a NotI-oligo(dT) primer. Five prime
end enriched, double-strand cDNA was digested with Not I and cloned
into the Not I and EcoRV sites of the pCMVSPORT 6 vector. Library
was not normalized. Library was constructed by Life Technologies, a
                                                                                    This sequence belongs to sequence cluster 1461.r

UI-E-EO1 is a normalized cDNA library containing the
constructed according to Bonaldo, Lennon and Soares,
synthesis was primed with an oligo-dT primer containing a
adaptor, digested with Not I, and cloned directionally
the synthesis of first-strand cDNA was ligated to an EcoR I
into pT773-Pac vector. The oligonucleotide used to prime
sequence that is located between the Not I site and the
(dT)18 tail. The sequence tag for this library is
Discovery in the Visual System, supported by National Eye

       Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
